Installing Saber View

This document contains specific information to prepare for and verify installation of Saber View View.

Install the latest version of Saber in a folder that does not contain an existing installation. A common license can serve multiple versions of Saber.

Note: The installation instructions in this document are the most up-to-date available at the time of production. However, changes might have occurred. For the latest installation information, see Saber release notes or documentation on [SolvNet](#).

This section covers the following topics:

- [Installing the Software](#)
- [Verifying the Installation](#)
- [Uninstalling Saber View](#)

Installing the Software

Ensure to close any open Saber applications before proceeding with the installation.

To install Saber View:

1. Download the Saber release to a temporary directory. You can obtain the latest Saber download instructions from the Release Library, which is accessible through SolvNet.
2. Select the Saber Harness option for installation while installing Saber in addition to other typical Saber components.

Installing Saber View

Verifying the Installation

For the latest installation information, see the Saber Installation Guide at <http://solvnet.synopsys.com/>.

Note: C:\Synopsys\Saber*<version>* is the default install location unless you choose a different location.

3. Extract the contents of `v2009.2.4.1.zip` available from the location `<Saber_Install_path>\Synopsys\Saber\<version>\Saber\saberview\` to a temporary location.
4. Navigate to the `<Temporary_Location>\v2009.2.4.1\` folder and double-click `install.bat`.

The Saber View installer performs the following tasks:

- Creates a program installation directory, `C:\Program Files\TTA\Netlist` unless you choose a different location.
- Creates the following icons on the desktop:
 - **License Control:** Launches licenses utility (Admin use only)
 - **WebUI:** Web-Based NetList Converter Application (Admin use only)
 - **Netlist:** Launches the SaberView rendering application (Users)

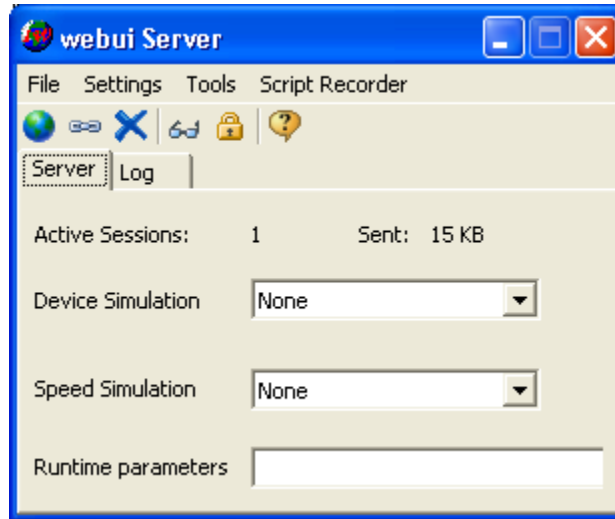

Verifying the Installation

Saber View requires only a single license daemon, `snpslmd`. For additional information, see [Installing Synopsys Tools](#).

To run Saber View View:

1. Check that your `SNPSLMD_LICENSE_FILE` or `LM_LICENSE_FILE` variable is set to a valid licensing server. If you do not have a license, contact Customer Support to obtain one.

2. Either double-click the WebUI shortcut icon from the desktop or double-click <SaberView_Install_Path>\TTA\Netlist\WebUI.exe. The Saber View window is displayed:

3. To launch Saber View, either click File > Execute or click  from the webui Server toolbar. The Saber View login page is displayed:

4. Enter the login credentials supplied by the Synopsys Technical Support to start using Saber View.

If you do not have a valid login credentials, contact Customer Support.

Uninstalling Saber View

To uninstall the software, select and delete the Saber View installation folder (C:\Program Files\TTA\).
